Portfolio: [daniel-davidson-portfolio.vercel.app](#) | GitHub: [github.com/Travelling-Human](#)

PROFESSIONAL SUMMARY

Full Stack Developer with experience in Django, Python, React, Node.js, and REST API development. Experienced in building responsive web applications, authentication systems, backend services, real-time features, and database-driven solutions. Currently working in healthcare IT support at eHealth Kerala while actively developing full-stack applications. Strong foundation in software development, debugging, API integration, deployment, and Agile collaboration. Demonstrated ability to independently design, develop, test, and deploy full-stack applications using a mobile-first development workflow and cloud tools.

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript, React, Bootstrap, Tailwind CSS
- **Backend:** Python, Django, Django REST Framework, Django Channels, Node.js, Express.js
- **Database:** PostgreSQL, MongoDB, MySQL, SQLite
- **Auth & APIs:** JWT Authentication, REST API Development, WebSockets, Third-party API Integration
- **Tools & Deployment:** Git, GitHub, Vite, Axios, React Router, Context API, Render, Vercel
- **Concepts:** Role-Based Access Control, Real-Time Applications, Authentication, API Development, Responsive Design, Debugging, Agile Development

PROFESSIONAL EXPERIENCE

Technical Support Specialist | eHealth Kerala | Dec 2025 - Present

- Provide technical support for healthcare information systems and end users.
- Troubleshoot software, application, and system issues to reduce operational downtime.
- Support healthcare IT infrastructure and assist with incident resolution.

Full Stack Developer Intern | KIDE, Trivandrum | Feb 2024 - Aug 2024

- Assisted in development and maintenance of web application features using JavaScript and backend frameworks.
- Debugged application issues and improved performance and reliability.
- Collaborated with cross-functional teams using Agile methodologies.

Data Monitoring Intern | Cogniphi | Jun 2023

- Monitored data workflows and maintained data integrity.
- Assisted with analytics reporting and data quality processes.

PROJECTS

TokenSys - Hospital IT Helpdesk & Asset Ticketing System

GitHub: [github.com/Travelling-Human/Token-system](#) | Live Demo: [tokensys-frontend.vercel.app](#)

- Built a full-stack hospital IT helpdesk and asset ticketing system for tracking support requests and equipment inventory.
- Implemented API-level role-based access for staff, IT admin, and manager roles, with ticket assignment, status tracking, SLA-based due dates, and ticket comments.
- Added real-time ticket status updates using Django Channels and WebSockets, allowing connected users to see changes without polling or manual refresh.
- Implemented device and parts inventory, completed-ticket archiving, custom CAPTCHA, and staff-ID authentication aligned with non-email hospital login workflows.
- Deployed the Django backend and PostgreSQL database on Render and the React frontend on Vercel.
- Tech Stack: Django, Django REST Framework, Django Channels, SimpleJWT, React, Vite, Tailwind CSS, Axios, PostgreSQL

MediaTrack - Full Stack Media Tracking Platform

GitHub: github.com/Travelling-Human/Media-Track | Live Demo: media-track-alpha.vercel.app

- Built a full-stack media tracking platform with a Django REST API and React + Vite frontend for managing and tracking media content.
- Implemented user authentication and account management with JWT-based authentication and protected API access.
- Structured the application into dedicated catalog, media list, tracking, and request modules, supporting organized media discovery and personal tracking workflows.
- Used MongoDB through Django's MongoDB backend and built a responsive frontend with React Router, Axios, and reusable UI components.
- Deployed the React frontend for public access on Vercel.
- Tech Stack: Django, Django REST Framework, Django MongoDB Backend, MongoDB, SimpleJWT, React, Vite, Axios, React Router

0625 Chatroom - Anonymous Text & Voice Chat Application

GitHub: github.com/Travelling-Human/0625-chatroom | Live Demo: zero625-chatroom.onrender.com

- Built and deployed a no-login, anonymous chatroom web application supporting text and voice channels, with no accounts or profiles required.
- Implemented public channels listed for all visitors and private link-only channels, with channel creation by topic and join-by-code access.
- Designed a terminal-style interface and a privacy-focused experience limited to text and voice, with no photo or video uploads.
- Stored channel and chat data in MongoDB and deployed the application on Render.

E-Commerce Platform (Django)

GitHub: github.com/Travelling-Human/Django-Ecommerce

- Developed a full-stack e-commerce application using Django and Python.
- Implemented product management, shopping cart functionality, and backend data handling.
- Designed a modern cyberpunk-inspired user interface.

EDUCATION

Bachelor of Computer Applications (BCA) | UIT Kanjiramkulam | 2024

Higher Secondary Education | Leo XIII H.S. School | 2021

LANGUAGES

Malayalam (Native) | English (Fluent) | Tamil (Intermediate)
